

Insulated Wire

ELECAL

Aluminum/copper-conductor PVC sheathed round wires of environmental protection

This product is suitable for the circuits of electric equipment, instrument, meter, telecommunication equipment, power and lighting of AC rated voltage 300V/500V and below, is available in fixed layout. The permissible continuous operating temperature of conductor shall not exceed +70°C, and the installation temperature of wire shall not be lower than -15°C.

Product standard:JB8734.2-1998

Technical parameter

BVVB

Copper-conductor PVC sheathed round/flat flexible wires of environmental protection

This product is suitable for electric equipment, lighting, automated system of AC rated voltage 300/750V as well as 300/500V and below, applied to movable connection in the dry or damp locations. The permissible continuous operating temperature of conductor shall not exceed +70°C, and the installation temperature of wire shall not be lower than -15°C.

Product standard:JB8734-1998
